KNOW YOUR CANOPY

Dropmate is a small, ultra-low power jump counter designed to track the use of your parachute or harness. Always on and ready to detect a flight, the onboard sensors have been carefully designed to track the total number of jumps and the time, date, duration, and altitude of the beginning and ending of each flight. Dropmate never needs to have its batteries charged or replaced. Once installed and set up, the Dropmate will live its entire life in your canopy or harness.

dropmate

The World's First Automatic Jump Counter

Flight Counter

Keep track of the number of jumps on your canopy

Altitude Monitoring

Track the deployment and landing barometric altitude of each jump

Date & Timestamps

Record the date and time of each jump

Easy Customization

If altitude, date, and time stamps are confidential information, they can be turned off in our app

Remote Reading

Privately and securely view and export canopy data from Dropmate using our app, Dropmate for Android and IOS.

SPECIFICATIONS

Length: 1.75 in
Width: 1.25 in
Thickness: 0.4 in
Weight: 0.6 oz.
Battery Life: > 14 years
